TREE SEEDSMEN

6 CONE STREET

ATLANTA, GEORGIA, U. S. A.

OUR PAMPHLET, "HOW TO MAKE TREE SEEDS GROW," ON REQUEST WITH EVERY ORDER

THE FOLLOWING CONDITIONS GOVERN ALL TRANSACTIONS:

THE PUBLICATION OF THIS LIST CANCELS ALL
PREVIOUS QUOTATIONS.

TERMS: Cash. Thirty days net or 2% discount for cash within ten days from date of invoice to domestic book customers. We expect remittance with order or other arrangements, satisfactory to us, from our foreign customers. PRICES ARE QUOTED AND REMITTANCES ARE EXPECTED IN U. S. MONEY.

ALL SHIPMENTS travel at customer's risk. After having taken receipt of transportation companies we are not responsible for delays, losses or injury to shipment while in transit. Customer's redress is with transportation companies only.

PARCEL POSTAGE. Domestic rates are governed by zone tariff. Parcel postage into foreign countries is 14c per pound or fraction of pound. In addition to this a number of countries require payment of a surtax. Remittances should cover sufficient amounts for postage, etc.

NON-WARRANTY. We use the greatest care to have all our seeds, bulbs, plants, etc., pure and reliable, but they are sold without warranty and without any responsibility, express or implied, in respect to the crop. All sales are made under these terms. We are under no circumstances to be held responsible beyond the invoiced value of our goods and we cannot, under any circumstances, consider any claim after the goods have been planted. All claims must be made on receipt of goods.

This list is published before the actual extent of some crops of tree and shrub seeds, offered in it, is known and our acceptance of orders is not a warranty for delivery but is subject to crop accidents and limitations of crops. Failing to receive the full amounts ordered from our collectors and growers, we reserve the right to reduce proportionately all orders which have been booked or to fill orders in rotation while supply lasts.

Conifers

Half ounce and quarter pound at ounce and pound rates, respectively. No seeds invoiced for less than 15 cents. No invoice for less than 25 cents. Quotations on large quantities given by letter.

IMPORTANT.—We exercise every care to send out tree seeds true to name. We cannot extend this guarantee to the result from sowing seeds of such varieties of conifers as “aurea, compacta, glauca, pendula, pyramidalis, violacea, etc.” Our collectors are careful in gathering the seeds from trees showing the peculiarities of the variety but the seedlings will often revert to the mother form and as we have no way of testing the seeds as to their producing true to variety, we send them out without any warranty that they will come true any given percentage to variety.

Trees and Shrubs

Half ounce, quarter pound, 25 lbs. at ounce, pound and hundred pound rates, respectively. No seeds invoiced for less than 15 cents. No invoice for less than 25 cents. Prices for larger quantities will be quoted by letter upon request.

We are using the following abbreviations:

e means evergreen, d means deciduous.

t “ tree s “ shrub.

v “ vine or climber.

db “ seed in natural hull.

c “ clean seed.

Example: et stands for evergreen tree.

Palm Seeds

IMPORTANT: Since palm seeds should be cared for by the planter as soon as possible after ripening and gathering, and as many kinds listed by us must be shipped to us over long distances, we have indicated approximately the months of ripening and orders should be in our hands well in advance of these dates to have best care.

Seed Disinfectants

Science is aiding the propagator now in his efforts to overcome diseases of plants and fungi in the seedbed and the use of these preparations should become general.

SEMESAN

"The Premier Seed Disinfectant," is the product of the laboratories of the E. I. duPont de Nemours & Co., Inc.

It may be applied in either the convenient dust or in liquid form to prevent or control effectively a most diversified variety of parasitic diseases and fungoid growths borne by seeds, seed pieces, plants, grafts, and soils.

SEMESAN is harmless to seed and plant life but extremely poisonous to disease and fungous organisms. It generally also hastens germination, produces sturdier plants, promotes earlier maturity and increases both the quantity and quality of crop yields. It practically stops damping-off.

"Semesan Makes Good Seeds Grow Better."

Sold in tin containers—2 oz., 50c; 8 oz., \$1.60; 1 lb., \$2.75; 5 lbs., \$13.00; 25 lbs., \$62.50; 50 lbs., \$122.50.

USPULUN

(The Bayer Co., Inc.)

Is another mercury preparation of the utmost importance to nurserymen, seedsmen, florists, gardeners, farmers, etc.

It also vitalizes seedlings by removing disease fungi from seed and soil. Treated seed can be stored away for a length of time without harm to the seed, but it will eventually affect the viability of the seed, of course. Its use in damping-off control does away with the disagreeable formaldehyde soil treatment and the poisonous corrosive sublimate. The original organic mercuries are characterized by this superior selective action in destroying harmful disease-producing fungi without injuring higher plant life. The host plants, freed from disease, are restored to full vigor and give increased yields.

"Uspulun Gives Larger Yields From Smaller Fields."

In tin containers—2 oz., 50c; 8 oz., \$1.60; 1 lb., \$2.75; 5 lbs., \$13.00; 25 lbs., \$62.50.

It must be remembered that these disinfectants do not revive dead seeds or seedlings but they will stop disease and prevent its further spread in a seedbed where early symptoms of the disease have appeared.

The cost of the treatment is nominal.

Poisons are not admitted to the mails but must be sent by express.
